

While I accept that some of you probably don't see the bigger picture, I believe others of you do. This "do nothing" bill is unenforceable (said every LE that testified today, on both sides). This bill is nothing more than a scheme to register all firearms. Throughout history, all tyrants disarm the people on the way to total control, which always ends in war, which has, every single time, led to the destruction of that country and society.

America was born because of our God given rights to weapons, which, with the blood of our ancestors, bought our freedom and this republic.

There is a reason you were *required* to give your oath to defend the Constitution. The proposal of this bill is in *direct* violation of the Second Amendment.

You may scoff at us and hold us all in contempt. But your oath was to us and God. You are in **BIG** trouble if this becomes law.

In God we trust,
Brian
