

I must admit, politics is a true turn off. You all pretend to represent your constituents however you play the sly whenever possible. How many days has this SB had to receive public input? Why are you rushing this through so fast? Is it possible to deceive the very people who vote you into office? This system is set up to give people false hope that their voices are being heard and that you are their representative. Shame on the system and shame on you for your actions as our "voice". This bill is a sham you know it and I know it. It exists to push a specific agenda and has nothing to do with crime rates, or murders or the safety of our children. It has everything to do with taking the power of the people away. If this bill was designed to keep guns off of the streets then the existing system would be utilized to do this. Our current background check system is broken, why not fix what we have instead of chisel away at our freedoms little by little until none exist? If you worked for the people you wouldn't have anything to hide and you would ask the public for their opinion. Why is this not being done? Why the secrecy? Thank you for reading my concerns, if you did. Please consider my concern for the direction you are taking this state/country. I feel you should present the opportunity for public opinion, instead of buying it.
