

Please Vote against this awful bill.

Universal Background Checks on all firearm transfer creates the system for the Federal government to soon know every person in the country that owns a firearm. **But most importantly it effectively creates a "FEDERAL GUN REGISTRATION DATA BASE"**

In every country where such a registration system has been established, it soon progresses to a licensing of all such firearms.

As has all recently happened in Canada and Australia, certain firearms or classes of firearms become illegal ( like all Pistols or semi-automatics) which results in the eventual collection and destruction of all such "illegal firearms". The definition of each type of firearm changing as time passes to eventually cause the government to out law virtually every firearm a step at a time.

All this will only disarm the helpless honest people.

Criminals and violent thugs never obey such laws---only the law abiding citizens do, leaving them helpless against such dangerous people. Violent crime has dramatically increased in Canada and Australia since they made this awful mistake.

**This isn't a background check law---it is just the first step in a Gun Control Law--** a program for the Federal Government to control the people!

Please share this with all who you know are interested in this matter

Thank You!

Dr.J. Philip Brittain
