

How will this bill make Oregon residents safer? Those who don't obey the law will not comply!

How much will this bill cost? How much time will it take from law enforcement doing their primary job of protecting citizens?

What is the cost and who will pay for the data base. If you vote for this bill you are responsible for the consequences. Any misuse or loss of data and subsequent expenses caused to Oregon citizens will be on your shoulders. I will not forget and will do everything to hold you accountable. There will be consequences.

I strongly oppose this action because it will be expensive, and will have little effect on criminals.
