

SB 941

Dear Senator,

I see the anti gunners are at it again. This bill is a redundant attempt at controlling and creating a law that can't be enforced to start with. Most of the guns that are registered in Oregon have been traded or sold or already given away to relatives. Most firearms after a person has deceased his collection of firearms will be sold privately, or given away without any record and that is after you pass this redundant piece of legislation if you so do.

If you actually think myself or others will submit family or friends to background checks to gift or transfer the ownership of a firearm, guess again. Please don't clutter up our already messed up ORS's with another redundant law.

Thank you, and please enter my comments as testimony on any hearings held on SB 941...
