Subject: Support for SB824

I ask for your support for SB 824 as a significant effort to improve air quality in Oregon.

I travel in the Tualatin Valley often and witness first hand the pall of brown that lies over the valley. In particular, the air pollution level on a warm calm summer morning is particularly obvious in driving the streets of Hillsboro.

As the valley further develops and traffic increases this can only get worse both in quantity and quality.
