

**Subject: Testimony RE: 895-2**

To Whom It May Concern,

Please consider my letter as testimony against 895-2.

If the CDC suddenly determines our children need 100 or 200 shots, will you go along?

What if, even though perhaps you currently believe hands down that the science is settled, something happens that drastically changes your perspective?

Whether it's an adverse reaction with you or a family member, or some extra research comes out, or whatever, do you want to maintain your right to change your mind? Or do you trust explicitly the money and power behind this?

Do you want to cede your rights and those of the rest of us to a corrupt and inept CDC with a financial incentive to push vaccination?

Please be objective and recognize our right to our beliefs according to the 1st amendment, being secure in our persons according to the 4th amendment, and our responsibility to care for and protect our children, first and foremost before your responsibility to them ever begins.

Fulfill the oaths you took to uphold and defend our Constitution.

Please consider why many highly educated, affluent parents would make decisions such as these which could ostracize them among their cohorts.

Please consider the fact that you would be using the department of education to enforce medical policy upon Oregonians, violating our religious or philosophical beliefs, which have nothing to do with education, medicine, nor any government business whatsoever.

This legislation is egregious and a complete and utter mess.

Oregonians spoke loud and clear against the similarly fashioned bill known as SB 442.

I have volumes of information I would be happy to share with you from a variety of sources. Many perspectives respected by established science. There are extensive peer reviewed studies available.

Please also consider the parents who have went through the worst horrid of losing or having a child maimed by a vaccine, an event that can and does happen, as stated in the manufacturer's package inserts. Consider their reasonable fear of inflicting the same pain or death upon their other children. Think for a moment if you were in their shoes.

Consider this program to be something akin to a "Ministry of Truth" and REJECT 895-2.

I have provided some information to encourage you to think outside the box:

Just a couple links suggesting that what you believe you know about the current medical establishments' assertions about vaccines may not be correct.

<http://heartruth.info/2014/04/07/dear-parents-you-are-being-lied-to/>

<http://www.livingwhole.org/dear-parents-are-you-being-lied-to/>

Here is a link from the CDC explaining how to deceive people into getting the flu shot.

<http://www.iom.edu/~media/E9B963EDB28645C5ABCC22467120662D.ashx>

Here is a link giving us all reason to at least CONSIDER other perspectives regarding how vaccines work or don't work.
