

**Subject:** I'm opposed to both SB895 and SB 895-2.

I'm opposed to both SB895 and SB 895-2. The first bill puts private medical info on public display. That is not only expensive but opens the school districts up for incredible lawsuits. I'm horrified by that. The dash 2 has already been defeated!! Why is this being totally disregarded against constituents' wishes?

It is a bill that goes against Informed Consent, parental rights, religious and medical freedom.

Publishing this information that may also violate existing HIPPA laws.

The -2 amendment to the education bill seems illegal. No bill in Oregon can go outside the scope of the clause at the top of the page that says "relating to." the relating to clause in the education bill deals with information that schools have to give out. This amendment, however, has provision requiring doctors to do things, and parents to do things. This is outside the scope.

What does this have to do with education? This is very sneaky and underhanded.

My sons are attending a wonderful charter school and I do not want that to change because of this amendment.

Please oppose this with me. This is not the proper way to get things done. This is a gross violation of parental rights.

Thank you.
