

**Subject: I oppose SB 895-2**

Dear Senators on the Education Committee,

I testify that I DO NOT support SB 895-2.

I feel this amendment is coercive, putting sideways pressure on schools, doctors, and parents.

True informed consent is about education, discussion and choice.

There is no "emergency" here. This is a tactic that being used to try to scare people.

The legislation that created the module for vaccine education and exemption is new. It has only been in effect for about a year. Can we look at the results from this new law and see how it is going?

The public only found out about this amendment yesterday. I feel it is right to allow a little more time in order for people to review the proposed changes before you vote on it.

Could you please clarify something about the bill? Would doctors need to sign off if our objections to a vaccine is religious or philosophical? It seems understandable for a medical exemption, but for a religious reason too?

Please support our rights to make medical decisions for ourselves and our families in a way that is not bullying,
