In accordance with my verbal testimony today I urge a do pass on these as above.
The Land Ordinance Act of 1785 and subsequent ordinances, etc. set a standard that the surveyor general was to survey the lands with Sections 16 and 36 of each Township of 36 square miles in Oregon designated for schools.
The ordinance says further that only limited areas would be reserved to the Federal Government.
Since not specifically prohibited, it is permissible. That gives the State control.
I invite you to inquire of me further as I continue to pursue an accurate chain of title.
Respectfully submitted,
Kay Bridges
