

Dear Senate Judiciary Committee,

Senator Steiner's bill is preposterous. Please don't give it any more time than is necessary. She claims to be trying to protect children but she allows people with swimming pools in their yards and bleach in their cabinets to walk the streets! I for one would love to see backyard pools banned entirely in this state because they kill far more infants and toddlers than guns do. Ban those pools! Also ban anything and everything that can be harmful to children if eaten. Ban Halloween! Make jail time mandatory for parents whose negligent child car allows their kids to become obese. Ban Diabetes!

Obviously, I jest. Hopefully equally obviously you will not move Steiner's preposterous bill out of your committee. Thank you for your time.

Best,
