**Subject:** In support of HB 3250: Testimony

ATTN: Members of the House Energy and Environment Committee

Dear Members,

Kindly support HB 3250, the sensible cap on carbon emissions that returns revenue to the people of Oregon.

It's long past time we Oregonians proactively address this issue.

The overwhelming consensus of the scientific community points to the urgent need to address the implications of human-caused climate change.

HB 3250 is our opportunity to lead the way with a solution.

It would reduce greenhouse gas emissions and inspire federal climate action. It is legally sound and is a sustainable, fair bill.

Please support HB 3250 and do everything in your power to make this legislation law.

Sincerely,  
Aaron Andrade
