Subject: Testimony in support of HB 3250

Dear Members of the House Energy and Environment Committee,

Our planet, our only home, is in great danger from climate change and we need to act now. Please support HB 3250! This law would put a cap on carbon emissions by auctioning allowances and distribute the revenue back to Oregonians. HB 3250 would work and not require any constitutional amendment.

States need to step up and act and this is Oregon's opportunity. Just like Alaska makes corporations pay for the extraction of fossil fuels so do we need to make them pay for polluting our atmosphere with greenhouse gases.

We have known for a long time the dangers of a warming planet and we can no longer ignore the problem. Please support HB 3250!

Sincerely,
Gisela S. Ray
