Subject: Testimony in support of HB 3250

Dear Members of the House Energy and Environment Committee,

I would like to ask for your support for HB 3250, which if passed, will make Oregon a model for passing carbon pricing legislation.

We need to act now to prevent further climate change. Pricing carbon using a revenue-neutral carbon fee/tax is the best way to do it. It's realistic, non-partisan, and will help prevent the 2-degree warming that could have terrible consequences for the planet. It would also redistribute the auction proceeds to everyone in the state.

Please support HB 3250 and turn it into a game-changing law.

Thank you,  
Donna Cody
