Subject: House Bill 3141

Dear Chair Witt,

In late March we came out in support of House Bill 3141. We had a couple of concerns - mostly different ones from other proponents of the legislation- about Hannah the Pet Society. This past week, however, we had a couple of conversations with Dr. Scott Campbell, the owner of the business, about the accessibility of medical records and general standards of care. In fact, he shared with us that the contract with the lessee of a pet stipulates that the individual has a right to complete medical records. These discussions answered our primary questions and resolved our concerns. As a result, we are now officially neutral on HB 3141.

Thank you for your time. I appreciate it.

Sincerely,

Glenn
