

More laws will never equal less crime. There are enough laws already, so many in fact that they cannot all be enforced at present time. Because of that one simple fact I would urge that this bill be struck down and more attention put into enforcing current laws, unless of course this is just one more way to erode at the second amendment. If that is the case then remember the oath that was taken by each of you and vote no. Please stop using your time in office with these incredibly stupid laws/bills and do something that will improve life in Oregon.
