**Subject:** Our Wolves Have The Right To Exist

To: Rep. Shelly Raszka;

HB 3515 is a waste of taxpayers' dollars when our money should be wisely invested into funding schools, repairing/improving infrastructure, development of clean renewable energy, and creating jobs, and protecting the natural resources for future generations...

**Not to be squandered or earmarked to destroy Nature's majestic wonders to appease the ruthless special interest minority.**

The vast majority of the people on this planet want our wolves and other wildlife protected and left alone to live in peace as the Creator intended in the first place.

Wolves and other predators are not the problem. It is the "sub-human culture" (i.e. rednecks, animal abusers, etc.) that are the REAL problem as they don't care about anything except for their own bloated, bloodthirsty, self-serving egos.

Wolves are a very important resource to the economy as it is one of the greatest tourist attractions to behold with awe and wonder.

Wolves are basically Nature's first dogs and supreme wildlife managers as they keep old and sick game in check, thus helping the stronger herds remain healthy and migrate from place to place, thus preventing overgrazing so that our vegetation would remain healthy and robust to prevent soil erosion, thus keeping our waters clean for our birds and water mammals to build their nests and lodges to raise their young, and for our fish to spawn. Only a mere fraction of 1% of livestock is lost to wolves and other predators when the majority of the losses of stock are stemmed from disease, the elements, and animal abuse, **not wolves**.

Wolves are Nature's pest control, and they have been here on this Earth before man even existed and they follow their ancestral routes as their predecessors have done for millions of years. They don't know political borders, carry passports, nor shop for groceries like us hapless humans do...

If man would have left these majestic canines

alone in the first place, we wouldn't have pestilences such as the Hantavirus, chronic wasting disease, mad cow disease, and other plagues.

But because of man's lack of empathy and compassion towards the Creator's majestic wonders, as well as the flagrant blasphemy against the Divine Spirit who created these precious creatures for us to nurture, behold, and revere sacred, we have these pestilences because man has turned against the Great Spirit and His purpose to worship a false deity known as the "almighty dollar", to appease the Devil.

Please remember that when man disrupts the balance of nature, Nature will fight back with a vengeance, and it is man who would suffer the supreme consequences for it's own arrogance, selfishness, and greed.

And so, it would be wise kill HB 3515. It is a horrible piece of legislation and the end result would be boycotts of the state's products and tourism, leaving the state's economy in ruin stemmed from job losses and business closures, and the state's image and charm would be tarnished forever, if this wasteful bill was passed and signed by the governor.

And therefore, I am urging you **NOT** to support nor pass this bill!!

It is highly imperative to keep wolves and other wildlife protected.

Keep in mind that it is the white man who encroached upon Nature's domain, **not the other way around.**

Our Native American and First Nations Indians have a deep respect and reverence to wolves, bears, buffalo, and other wonders of Nature, for they are revered sacred and it is a flagrant violation of their spiritual rights to destroy these majestic icons.

If some of these ranchers are not willing to (learn to) co-exist with wolves and other wonders of Nature and use non-lethal methods, then they should give up ranching and move to the big cities.

The barbaric lethal methods in the name of so-called "tradition" and the "shoot, shovel, and shut up" or "shoot first and ask questions later" attitude and ruthless redneck mentality from the 19th Century have no place in the 21st Century nor anytime in the future.

It's time to move forward into the 22nd Century and beyond, not revert back to the Dark Ages from the previous millennium.

Please save and protect the Creator's gifts  
for our future generations to behold...

Thank you  
(Unyah)
