Subject: Bill HB 3515

House Agriculture and Natural Resource Committee,
Shelly Raszka,

Please do not support bill HB 3515.

The Grey Wolf is loved around the world!

We as Europeans decimated the Wolves in Europe
as well as many other species.

Now in this land we chose as home, us Europeans
are doing the same thing over here. We cant let this
happen. We must learn from the mistakes we made.
Now many tourist from around the world come here,
to the US to see Wild Life.

Lets use the non lethal tools (Fox Lights Ect...) to save and bring
population numbers back up to where they need to
be for a balanced ecosystem. If we have preventative
measures to protect ranchers , lets use them.

Its time we use what we learned in kindergarten

SHARE :)

Please include the grey wolves on Oregon's list
of threatened or endangered species

Thank You ,
