Why on earth would any sensible human being want to bring an entire species to extinction over hatred or greed? Newsflash--animals, including wolves, inhabited this earth first. The wild mountains of Idaho, Oregon, Washington, Wyoming, and Montana, among others, belong to wolves. Humans have been intruding on their territory for hundreds of years. If you're so worried about your livestock, you should protect them better. Wolves shouldn't have to suffer for being hungry.

Do you remember the western black rhino? It was brought to extinction in 2011 by greedy poachers who had no respect for the lives of animals. Now tigers are now critically endangered--Siberian, Sumatran, south China, Bengal--Every single one of them.. All because of humans.

There are 77 wolves left in Oregon. SEVENTY-SEVEN. How dare you play God? How can you sit there so selfishly, knowing you're helping bring a species to extinction?

Get rid of that atrocious bill and leave the wolves alone. You have no right to choose whether wolves live or not.

I don't know about you, but I want my future kids to be able to see a real wolf in 50 or so years. Please come to your senses and get rid of that bill for the sake of the future of all animals and humans alike.

Respectfully,

Jerica Roth, a concerned, sensible human being
