Subject: Wolves in Oregon territory

This is absolutely insane. Did we not bring cattle and introduce them into this country? Where in God's green earth do we get the right to not give his creatures their proper place on earth? Are we, supposedly the smart and intelligent humans, so barbaric that we would allow one of God's greatest creature creations to be eliminated from the very place God put them? Why or how is it, we can build super powered cars, trucks, planes, trains and other locomotive transportation with computers that allow the driver to pin point a destination to an inch but, we aren't smart enough to come up with a solution to living with all of God's creatures? We would rather eliminate than learn to live together. My opinion it's called being "LAZY". Send a man to live in outer space but, can't seem to figure out how to live with a wolf. Lively hood...REALLY? What about theirs?

PS: The email address should give one an idea of what wolves mean to me.

Thank you.
