Subject: Message for the House Ag & Natural Resources Committee Members

I am writing to let you know how strongly I feel about protection of predators and how disappointed I am in the proposed legislation that promotes and facilitates persecution of wildlife: HB 2050, exempting counties to allow hound hunting of cougars; HB 3140, expanding predator damage control studies & implementation under the guise of an "emergency"; HB 3188, more predator control to benefit agriculture; HB 3514, wasteful reimbursement of "suspected" wolf-killed livestock; HB 3515, promoting the perpetual persecution of wolves.

I value pristine landscapes and healthy ecosystems teeming with wildlife -- all kinds of wildlife. I value livestock producers who grasp biological principles and accept that stewardship of their stock is their responsibility and requires constant vigilance.

Please do NOT support HB 2050, 3140, 3188, 3514 and 3514. I also ask that you let me know your stance -- and if you support these bills -- please include your rationale.

Thank you.
