Subject: Comment for HB 3515

Hello,

To ensure gray wolves ARE able to be protected as an threatened and / or endangered species in the state of Oregon, please vote "NO" on HB 3515. Wolves are a vital part of our ecosystem, and I am afraid humans will hunt them to extinction within my lifetime. Please do your part to ensure a safe future for these majestic animals. Saving them will help many other species of animals and even plant life in your beautiful state.

Thank you,
Lauren Watkins
