**Subject:** Oregon is not just for people

Oregon House Agriculture & Natural Resources Committee

Dear Legislators,

I am concerned about a series of anti-animal bills that I hear are coming down the pike: Bills 3515, 2050, 3140, 3188 and 3514 . If it wasn't so awful, it might be funny that a state so rich in flora and fauna is considering the claims of hunters and ranchers above that of our natural inhabitants--that which makes Oregon unlike any other state. The way we treat our wildlife and our forests and our ecosystems defines us and determines our sustainability. In a world so full of human made disasters, we need a place apart. Please keep Oregon the rich and vibrant natural place it is. Vote down these bills that speak only to a few, and legislate for the many.

Thanks for caring.
