SB895 -3, -5 and -6 amendments

April 16, 2015

Dear Chairman Roblan and members of the committee:

- 1. Would all those concerned with the health of our children, vaccination education, informed consent, vaccine safety, parental rights/privacy, exemption data etc, entertain the notion to just take a deep breath?**
- 2. Is SB 895 with the proposed -3's, -5, and -6 amendments, so paramount in importance that it has to happen now?**

To Senator Steiners Hayward's credit, Oregon is having a much needed conversation on a complex issue, and SB 895 in its multiple iterations is a poor platform for a contentious issue to be honestly and calmly discussed let alone becoming a law.

I propose that we wait and I think the data that Oregon already possesses regarding exemptions, would back my suggestion for consideration and caution.

My two cents.

Respectfully and humbly submitted,

Michael Framson

Medford, OR
