Subject: SB 895 - Please Vote No

Dear Senate Education Committee,

I urge you to please vote no on SB 895 regarding vaccines. Reject it because:

- it has nothing with to improving education.
- it implements an unfunded mandate and gives schools and health authorities more things to do with little effect.
- vaccination information is already public information and readily available to anybody that looks.
- medical procedures are a private health matter to be discussed and determined between a person and her/his doctor.
- it violates our constitutional rights by removing the religious exemption.

There is no disease emergency. Please focus on making sure Oregon's hungry and poor kids (25%!) get good nutrition because that is the single biggest thing you can do to promote health and improve school performance.

This bill is a huge waste of everybody's time.

Thank you!

Sincerely -

Sandra Ganey
