Subject: Wolves Needed for Diversity

Dear Representatives,

I am a lifelong Oregonian with a strong farming and ranching family connection. We need wolves as well as other predators in order to keep biodiversity. Wolves keep the elk and deer population in balance, thereby allowing vegetation to grow and the ecosystem to thrive. By all means, reimburse farmers and ranchers if wolves kill their animals. Do not move House Bill 3515 out of committee to the general House.

Thank you,

Linda Cochrane
