**Subject:** **HB3515**

Please kill bill HB3515. Our regenerative natural systems need to be managed by up to date 21C science and NOT politicians and ignorant hate mongers. Wolves are essential. When is our Government going to set an example instead of being an offender? Livestock are destroying and degrading the ecosystems. Eating meat is no longer considered necessary nor is it healthy. There are lengthy scientific papers written on these subjects. It's not my opinion, they are the facts.

Kill HB3515. Thank you.

Margaret Southwell,  
Grants Pass  
OR
