Dear Members of the Agriculture & Natural Resources Committee:

I understand that you are holding a public hearing on new anti-predator bills and I would like to be heard. I am not a citizen of your beautiful state but I truly hope that you consider killing this particular bill. Please set examples for other states pertaining to wildlife. Predators are necessary to bring balance to certain environments as you have probably noticed with Yellowstone park for example.

I am a full blood Oglala Lakota from the Pine Ridge Indian Reservation and I have such a passion for wildlife conservation. I think of wolves in particular as relatives as they have endured a similar history to ours. This is how much I feel about them, I understand that you must listen to your constituents too but I think that other states will be looking to yours as a guide. Please think about your choice and listen to everyone's concerns in this and the other bills. Thank you for reading my concerns, God bless.
