Subject: Please do not de-list wolves from the endangered species list

Hello,

I am writing to urge you to not de-list wolves from the endangered species list. They are a vital part of our environment and are being wrongfully, and brutally I might add, murdered. There is no justification good enough to de-list them.

As an avid visitor of the great state of Oregon my family and I will boycott traveling to your state if wolves are de-listed.

Thank you,

Spryte Heithecker
