Subject: Opposed to HB 3515

I am writing to express my opposition to HB 3515. The bill is a hamfisted effort to thwart effective ecosystems in favor of special interests. Wolves can benefit many areas in Oregon which are out of balance in the absence of apex predators. The effect of this bill would be for Oregon to forever put its head on the sand. Even if this generation of leaders in Oregon were to be ignorant enough to pass such a bill, it should not bind future generations of Oregonians to the stupidity of the moment.

Thank you,

Matt Stone
