**Subject:** Anti-Predator Bills in Oregon

Shelley,

I'm quite disgusted to learn of the bills, House Bills 3515, 2050, 3140, 3188 and 3514, that are looking to be passed in Oregon that will keep animals like wolves from ever entering the endangered species list and anything else that threatens our **NATIVE** predators. We live in a beautiful and wild state, and to think that after all the habitat that has been destroyed for our wildlife, we are going to make it even harder for these beautiful creatures to exist alongside us. I've been losing all faith in any level of government to make the right decisions to protect our wildlife and wild places which is extremely important to me. Not only are these animals beautiful, they are an important part of the ecosystems in which they live and they deserve a right to thrive. I urge you to please do the right thing and keep these animals from losing any hope of existing in the future and for future generations to come. If there are farmers or residents that live where these animals are present and are driving bills like this to be passed because they feel threatened, I believe all the intelligent people that run our government can come up with better solutions so all may live in harmony. We've already lost so much as it pertains to wild places and animals and I think we should protect what we have left.

Thanks for listening.

Best regards,
