

If House Bill 3526 doesn't address the fact that every main street in town gets run outta biz by the cheap chinese crap dealers called wall mart then it's pissing into the wind.

lets pass a bill that makes it a crime to sell shit that is garbage right outta the package like a chinese made scooter, or a piece of crap halogen bulb that goes flash the first time you turn it on. Until we do something like that we will be destroyed and our landfills will fill up with one cheap p.o.s. product at a time.

thanks for YOUR time.

americans are getting screwed.
