Subject: SB 716

Thank you for providing opportunities for the sharing of public opinion regarding SB 716 regarding the annexation of urban land for industrial development.

Clearly, the response of the general public in addition to much administrative opinion is strongly opposed to such annexation.

Therefore, the work session as mentioned would be contrary to the wishes of the public and would serve, in essence to mostly benefit the interests of profit and business venturism rather than protect the quality of life that taxpayers and homeowners pay for and wish to preserve.

Please do not hold a work session, and instead focus efforts and taxpayers' money on ventures that will be beneficial to the majority instead.

Sincerely,

Dr.Ray Tricker
