Subject: Support for HB 3470 - The Climate Stability and Justice Act

Dear Chair Vega Pederson and members of the House Energy and Environment Committee,

Credible scientific sources make it clear that global warming is worsening and that Greenhouse gas emissions are the cause. It doesn't look as if we can afford to wait any longer to stop using fossil fuels. And as a grandmother, the continuation of our species is extremely important to me.

It is clear that HB 3470 is a well thought out bill and would go a long way toward limiting greenhouse gas emissions for Oregon.

I urge you to do all you can to advance HB 3470 this legislative session. Please take action to pass HB 3470 out of Committee on April 21st.

Sincerely,
Lee Lull
