Dear Chair Vega Pederson and members of the House Energy and Environment Committee:

I am writing to ask you to pass House Bill 3470 (the Climate Stability and Justice Act).

I made this poster featuring a picture of my granddaughter. All of you represent her and her future. Will there be clean energy, clean air, and enough water in the world she inherits?

Her future is in your hands. HB 3470 by itself won't completely solve the problems we face, but it will be a start, and it will show that our elected leaders are actually prepared to lead.

Please pass this bill out of committee and do everything you can to enact it in this session of the legislature.

Thank you.  
Matt Witt
