**Subject:** HB3470

Ms. Patrino:

Please support HB 3470, a bill on climate change. The Rogue Valley, Oregon, the Nation and the world are facing serious threat from climate change due warming caused by increasing CO2 emissions. The IPCC, various national academies of science and other major institutions all agree that the science is clear on that we must keep atmospheric CO2 concentrations below 350ppm to avoid catastrophic impacts. HB 3470 will help achieve that goal. Please do what you can to support the bill.

Thank you.
