Subject: HB3470 YES!

Dear Chairperson Pederson,

Please make the passage into law of HB 3470 your top priority! We are at - indeed past -- a critical juncture in our country's and world economic development.

We must draw from our collective intelligence of educated adults, and not the "so called" invisible hand guidance of "profit opportunities" in making choices regarding our use of the natural world.

HB 3470 is a great strategic statement of the people of Oregon to do exactly this. It further augments the peoples of our neighboring States, Washington and California, as well as other provinces and states in North America.

Once enacted, this bill will set up new opportunities for economic development that will be sustainable, for the long run.

Your efforts here are most appreciated. I am an Oregon citizen who is committed to taking care of our natural home and not burning it down.

sincerely,

Torrey Byles
Talent, OR
