

I feel if this goes through, it will be against the constitution. That makes you criminals. Just because you shove the bill through, that doesn't make it as being represented by the leaders. You put it down our throats, and that makes honest citizens into criminals, which in reality the so called representatives are the ones breaking the constitutional laws. I will sign any petition that I see to recall anyone that votes for this and any other gun law. Plus, I will help anyone that puts a petition up to limit the times a person can be in office. Already we have a governor that was not doing things on the up and up. So that means we the people can push back against the lawlessness of our so called representatives. You are not voting what is good for the people. This needs to change back for the people and of the people.
