

Dear Committee Members:

The following facts stand in stark contrast to Michael Bloomberg's propaganda. Please think before you vote.

1. Criminals are enough smarter than the majority of our state senators that they will obtain firearms without submitting to a background check.
2. There is no way to enforce this farce, since authorities cannot know the source of most firearms. This is why most law-enforcement officers oppose this bill.
3. Honest citizens would be required to spend at least \$10.00 (the current cost of each background check for dealers) for information that would have ZERO impact on criminals' possession of firearms.

Please think before you vote.
