

My name is Charles Statton. Every year I loan several firearms to a local man who volunteers his time to teach the Hunter Safety course in Banks , Oregon and he uses them in his teaching of the course. If 941 is passed, I will no longer be able to do this and a man volunteering his time for the benefit of the community will no longer be as effective as he could be because legislators pass an ill conceived piece of legislation to solve a virtually non existent problem.... A close friend of mine just last week drove all the way to Seattle to buy an antique collector firearm and their new background system was down so it was a trip up and back for nothing...exactly what public safety concern was addressed by this colossal waste of his time.

Please ask yourself before voting..... what demonstrated public safety problem will this legislation solve ???, and since gun ownership is part of the Bill of Rights, what balance of problem vs solution is there in this legislation to balance such an infringement on a Constitutional right ?

thank you
