

When background checks were initiated on used guns at gun shows, the public was told this would help with the criminals having guns for violent crimes, committed with guns from gun shows. Well guess what, you were wrong. Now you want me, a person with no record to be cleared on my own guns. When will you figure out that the guns have been stolen or brought in from outside Oregon. The criminals that commit crimes with weapons need to be put away. Most people that sell guns LEAGALLY do it at the gun shows. We all know it is already against the law to sell to a felon. How many classified ads have you seen on used guns? For once I wish our government officials would actually look at the real world and not through there rose colored glasses!
