

1) This act increases the financial burden incurred by the law-abiding citizen in order to exercise 2nd Amendment rights, which "shall not be infringed", but routinely are.

2) This act will not change the behavior of the law-breaking person, nor make unlawful possession any more difficult.

3) The declaration of an emergency is a legislative fraud, designed only to prevent action by the voters to overturn such an awful piece of legislation -- an admission that this legislature knows the public won't like it, yet cynically pursues it regardless.

4) An entirely partisan measure, this act does nothing to improve the economy of the state, the safety of her people, the effectiveness of law enforcement, or the civility of society, but does act to increase the political divisiveness in our population, and provides a new way to make citizens into felons for simple ignorance of the maze of laws you have enacted.

Please don't do this.
