

Good day committee,

I'm writing to ask where is all the evidence that the 2000 bill passage to register guns created , in which CRIME is reduced?

I have not heard of any significant reduction in the crime rate, because Oregonians were caused to register their guns!!

So where is the evidence your bill would cut any crime?

This is not a good means to control crime in Oregon.

No criminal is going to buy his weapons thru a legit gun dealer just because the law say he should do that.

Vote no!
