

I urge you to reject this horrible legislation. It won't do what the proponents say, in fact just the opposite. Not one life will be saved or a single crime prevented. This is another step closer to registration of all firearms, gun bans and confiscation. Only honest people will comply, while the bad guys will do what they always do---ignore the law. By the way, why is it necessary to submit the make, model and serial number of the gun to be transferred, since the only stated goal is to prevent the firearm from falling into the wrong hands? Could that be considered Registration? I don't want Oregon to become California. Thank you, Julie A. Cabal
