

Let me start off with this legislation is completely unconstitutional. This is a slippery slope if you start restricting rights then it's ok to restrict the next freedom then the next then the next then guess what we aren't free anymore or we are only free to do what we are told we can do.

We don't need more gun laws in the books, we need to enforce the ones we have like arresting felons that get turned down a purchase a simple thing as that doesn't even get enforced.

Chicago a state with some of the toughest gun laws are one of the highest murder city's in the country and very high crime rate. So guess what the stricken gun laws didn't stop killing. Just made it easier to kill the law abiding.

It also needs to be noted that crime rates have declined nationally when firearm purchases spiked nationally.

On the measure itself a law abiding citizen shouldn't be put in a position to possibly break the law or be inconvenienced by something that is every law abiding citizens right. You should be able to loan a firearm to a friend that you know had always been a law abiding citizen. Not have to do go down have a background check done then have to go back and do it again when it returned. That is just silly obviously not completely thought out.

I could go on page after page why this measure is bad but the number one is that it's UNCONSTITUTIONAL these aren't rights that can be limited or taken they are are right GOD GIVEN RIGHTS.

Thank you for your time
