

I pray that you consider my words.. It does not matter if I do not own a firearm or do as I believe strongly that this unlawful bill should never be imposed upon the Oregon public or any other state. Think logically if the sportsmen are castrated with this bill how does one think that the wetlands and deer and elk ranges will be funded. The sportsmen, hunters, collectors, ect' pay millions into the state coffers each year. This bill will not alter the facts that the criminals and gangbanger will still acquire weapons illegally and the police will never know about them. There already are strong government background checks for the purchase of weapons. But you want to penalize the lawful citizens of Oregon.. The gig problem is with the Obamas administrations wanting to confiscate all firearms.. One only has to study Nazi Germany history to see that our government is doing the same thing here. There anti gun control directives are. way out of hand. The judges are not prosecuting the criminals with the weapons but only giving the criminal a slap on the wrists. Why are the killer cops who are out of hand and killing without cause not forbidden to carry firearms. They kill openly as many as criminals and get away with it..They have stringent mental testing and their nutty ideas get by the interviewing boards.. So mental health is not a real issue...Over ten thousand teenagers have been killed by texting while driving....Well then,, compared the smart phones are more dangerous than firearms. I guess then that smart phones will be the next thing to outlaw..

Please do not allow this infringement upon our Second Amendment and our Constitutional rights be passed.

Thank you.....Robert Buker,
