

When you look at the number of sports fishermen in Oregon, why don't we have at least two representatives on the State Fish and Wildlife Commission? I have heard that sports fishing licenses make up 40% of the revenue for ODFW.

I think we have about 600,000 anglers in Oregon and they bring in about \$680,000 in retail sales. I think with this number of anglers we should have a lot more representation on the State Fish and Wildlife Commission.
