

Please vote NO on HB2509. There are many ways in which its pro-GMO provisions would harm Oregon farmers and agricultural industry—notably, the contamination of organic and other farms—and they've been widely documented.

As a consumer who has spoken with many farmers (both conventional and organic), OSU affiliates and agriculture experts, I ask you to support a vibrant Oregon economy by voting NO on this bill and its outside-interests proponents.

Respectfully,
Joan Pinkert
