

Please know that my family is in contact with are strongly **opposed** to [House Bill 2509](#), so we're looking for that piece of legislation to *not* leave the Senate Environment and Natural Resources Committee during the [3pm](#) session today. Thank you very much.

There are many opponents to this bill who need time to fight this last minute power grab by big ag/chemical lobbyists. The fact that it is being rushed through is a big clue that it is bad legislation that needs more work.
