Subject: Opposition to HB 2509

Ms. Reiley and Senator Edwards,

Please note that I am opposed to HB 2509 and urge the committee members to vote against it. It is time to protect family farmers and local communities from corporate powers and products and this bill does not do that. It puts the onus of GMO contamination on the local farming community and they are unable to mount those fights. Thus, this bill is a defacto method to allow contamination. Please do not be persuaded that this bill provides some process or remedy for those engaged in the debate over the GMO choice. It gives the playing field to the corporate interests and the state should not be involved in promoting corporate products. Please reject this bill. Thank you.
